Synopsis book

The Consuming Fire

--the second thrilling novel in the bestselling Interdependency series, from the Hugo Award-winning and New York Times bestselling author John Scalzi

The Interdependency, humanity's interstellar empire, is on the verge of collapse. The Flow, the extra-dimensional conduit that makes travel between the stars possible, is disappearing, leaving entire star systems stranded. When it goes, human civilization may go with it--unless desperate measures can be taken. Emperox Grayland II, the leader of the Interdependency, is ready to take those measures to help ensure the survival of billions. But nothing is ever that easy. Arrayed before her are those who believe the collapse of the Flow is a myth--or at the very least, an opportunity that can allow them to ascend to power. While Grayland prepares for disaster, others are preparing for a civil war, a war that will take place in the halls of power, the markets of business and the altars of worship as much as it will take
